FOR IMMEDIATE RELEASE

Declaration of Stage 3 Water Conservation Measures

Reduced water demand and a slight increase in supply has allowed the City to move from **Stage 4** to **Stage 3** water conservation measures.

Cooler weather and dormant lawns have helped cut water demand in half. Summer time demand reached over 6 million gallons per day (mgd), and now has decreased to 3 mgd.

December rains and less demand on ground water supplies have helped to increase water supplies. The Guadalupe river flow is now up to over 50 cubic feet per second (cfs), where this summer it reached single digit flows. Groundwater aquifer levels have increased slightly.

The watering schedule for **Stage 3** allows for landscape and lawn watering with hose-end sprinklers or automatic irrigation systems from **6:00 a.m. to 9:00 a.m.**

- a. On **Tuesday** and **Saturday** for street addresses whose last digit ends in **odd** number.
- b. On **Wednesday** and **Sunday** for street addresses whose last digit ends in an **even** number.

Landscape watering with a hand held hose is allowed for all addresses, every day from 6:00 a.m. to 9:00 a.m. and from 7:00 p.m. to 9:00 p.m.

For additional information concerning Stage 3 – Crucial Water Conservation Condition Guidelines/Rules please contact the Public Works Department Office at (830).258-1221, or go to www.kerrvilletx.gov.

Kerrville is under **Stage 3 – Crucial Water Conservation Measures.**

HOW & WHEN YOU CAN WATER					
Year Round Water Conservation (Mandatory)	Stage 1 > 65% SOC 7 Day Avg.	Stage 2 > 75% SOC 7 Day Avg.	Stage 3 > 85% SOC 7 Day Avg.	Stage 4 > 95% SOC 7 Day Avg.	Stage 5 > 100% SOC 7 Day Avg.
